

The CBER HIVE Team is pleased to present...

A Seminar:

**“Building Blocks of Rapidly Iterable, Reproducible Clinical Trials”
by Mark Graves- Founder of My Integrated Research Environment (MyIRE)**

**Thursday –May 10, 2018
2-3 pm
WO Bldg, 52/72, Room 5342
*Remote Access Available***

Easy to use tools are revolutionizing medical innovation, but the "telephone game of research software tools" has implications on participant privacy and scientific integrity. Increasing expectations for privacy and integrity can be achieved by harnessing the power of existing open technologies. MyIRE will present strategies for successful adoption of open technologies and case studies of building blocks for rapidly iterable, reproducible clinical trials.

FOR QUESTIONS and REASONABLE ACCOMMODATIONS: For this particular event, contact Krista Smith at krista.smith@fda.hhs.gov with questions.
